 GRIFFIN DESIGN
 SCALE 1/2" = 1' - 0"

The architect prepares these concepts, lighting fixture placement, and construction specifications only. The designer is unaffiliated to determine the structural or electrical engineering, construction, rigging, handling, or use. All materials and construction methods shall be approved by the National Fire Protection Association, including fire safety, structural and electrical codes, including fire, structural and electrical codes, including fire, structural and electrical codes, including fire, structural and electrical codes. This drawing is prepared by National Director and Educators to understand the design and construction of the fly system for the purpose of the Director or structural engineer.
